SCHOLARSHIPS AVAILABLE Visit the NAA website at nearborists.org or contact the NAA office at 402-761-2219 or staff@nearborists.org to request an application. Scholarship applications are due 60 days prior to each event.

SPONSORSHIP OPPORTUNITIES Don't miss a valuable opportunity to enhance the visibility of your company at one or more of the Arborist School events, and let attendees know that you support continuing education through your sponsorship. Please contact the NAA office about available sponsorship opportunities.

CANCELLATION POLICY A refund, less a \$25 administrative fee, will be given for all requests received 3 weeks prior to event date. If study materials have been sent, no refund will be issued.

Tree ID, Evaluation & Selection, Planting & Establishment

LEARNING OBJECTIVES:

- *Understand plant characteristics that are important to identification.*
- *Understand plant classification structure and nomenclature as it relates to appropriate tree selection and anticipated tree characteristics and limitations.*
- *Identify the various benefits and limitations of common landscape trees.*
- *Distinguish between deciduous and evergreen trees and understand their appropriate uses.*
- *Identify a wide variety of native and adapted trees commonly found in Nebraska landscapes.*
- *Understand the concepts of provenance and hardiness as they affect tree selection and health.*
- *Understand the importance of species and temporal diversity in the urban forest.*
- *Understand the concept of “right tree in the right place.”*
- *Identify and understand the impact of environmental, soil, and other conditions on tree establishment and growth.*
- *Understand proper planting and maintenance practices.*
- *Understand site considerations, cultural management techniques, and overall plant health care.*
- *Understand basic tree selection, installation and establishment.*

11 NAA certification credits. Handouts & Field study sheets will be provided. Registrations will be processed in the order received. Morning snacks & lunch is included in registration fees for all events.

Pruning, Climbing & Safety Class

This class is designed for beginning arborists. The class will instruct on pruning, safety, knots, and climbing and will cater to the individual needs of attendees. Pruning instruction will include significant hands on practice for attendees. Climbing instruction will also include how to safely maneuver around in trees.

LEARNING OBJECTIVES:

- *Understand the basic concepts of climbing.*
- *Identify and safely utilize tree climbing equipment*
- *Identify and utilize the proper knot for a specific application.*
- *Identify specialized tree maintenance practices such as cabling and bracing.*
- *Understand tree physiology and the effects of pruning.*
- *Identify and understand decay and risk assessment of trees.*
- *Identify various types of pruning cuts and their respective application(s).*
- *Identify and understand the safety aspects of chain saws, working around electrical wires, traffic control, and other work site issues.*
- *Understand aspects of aerial rescue.*
- *Understand the importance of employee training and establishment of a job work plan.*
- *Understand safety & ANSI Standards.*

13 NAA certification credits. Materials Required: *Students should bring gloves, safety glasses, hard hat (nonconductive), hand saw and safety lanyard. Bring a climbing saddle and rope if you want to participate in the climbing portion. Optional Materials:* *Climbing saddle, climbing rope (1/2 inch dacron, 120 feet or longer), pole saw or pole pruner, a bull rope (lowering line) and in the event of inclement weather, a rain coat. Morning snacks & lunch is included in registration fees for all events.*

Plant Health & Tree Biology Class

The class is an introductory class covering tree biology, soils, fertilization and nutrition, insect, and diseases common to trees in our area. It provides in-depth training for those who are considering arborist certification or want to learn more about trees and tree care in general. The seminar is designed to specifically prepare students for certain areas of the NAA Certification Exam. Offered only once per year, it is the most comprehensive tool available to arborists.

LEARNING OBJECTIVES:

- *Understand tree biology.*
- *Identify and understand common insects and diseases of trees.*
- *Identify and understand the cause of common tree symptoms (i.e. diagnose tree disorders).*
- *Understand urban soils and their relationship with tree biology, establishment, and maintenance.*
- *Identify and understand nutrients and fertilizers and their relationship to tree function.*
- *Understand tree support and protection systems.*
- *Understand construction impacts to trees.*
- *Understand tree assessment and risk management.*

13 NAA certification credits. Registration fee for Plant Health & Tree Biology class includes: ISA Arborists' Certification Study Guide, NAA certification study guide questions, Common Insect Pests, Diseases and Abiotic Problems of Trees brochures, NAA certification exam (Certification fee not included.), 1 year subsidized NAA membership (offered to non-members only) Morning snacks & lunch is included in registration fees for all events.
